How to Register your Wireless Device

**Step 1:** Find and record your Wireless Network Card Address (MAC Address). You only need to complete this step if you are registering the device from another computer. Otherwise you will be able to have the registration wizard detect your MAC during setup.

Windows (XP and newer)
1. Click on Start, then Run.
2. Type "cmd" in the box and press Enter (leave the quotation marks out).
3. In the box that appears, type "getmac -v" (without quotation marks) and press Enter.
4. Find the Wireless Network Connection heading and look for the Physical Address of your wireless card. It should be 12 characters long, displayed similar to 00-0B-8D-33-98-D4.

Mac (OS X 10.5 and newer)
1. Click on the Apple Menu in the upper left corner.
2. Click on System Preferences.
3. Click on Network.
4. Click on AirPort in the left hand column of connection options.
5. Click the Advanced button.
6. Find the AirPort ID at the bottom of the window. It should be 12 characters long, displayed similar to 00-0B-8D-33-98-D4.

**Step 2:** Register Wireless Hardware Address
If registering from your unregistered computer or device, set your device's wireless network connection software to use the wireless network UNL-Wireless-Registration. Open any web page, and you will be redirected to UNL's Terms and Conditions page. Read and accept the terms by clicking **Agree** at the bottom. You will then be taken to UNL’s Wireless Registration page (http://wireless-reg.unl.edu).

1. If you are a UNL student, faculty or staff, log in with your My.UNL (Blackboard) username and password. Otherwise if you are a guest, go to the Visitor Registration section and click the link.
2. Click on "Register a card."
3. Type in the 12-character physical address of your wireless card. If a button labeled "Find My address" appears, click it to have the address entered automatically. To type in the address, use upper or lower case, and omit any separator colons. Then click **Next**.
4. Check that you entered the address correctly, and click **Next**. You will see a confirmation page. Your device may not connect immediately; it can take up to 10 minutes before your UNL-Air registration is active. After 10 minutes, proceed to step 5.
5. **Important! You must now set your device to connect to the UNL-AIR wireless network.** Otherwise you won't be able to connect to the Internet while connected to the UNL-WirelessRegistration network.

If you need assistance during any part of this process, contact the UNL Computer Help Center at (402) 472-9370, or visit the CBA Help Center in CBA 119.
